## CLIENTS TESTAMENTS

I had the opportunity to begin working with Faheem in 2017 through the well-known freelancing website, [www.upwork.com](http://www.upwork.com). Faheem's initial application rose to the top of the more than 300 letters of interest we received, and his subsequent work has only confirmed our decision to bring him onto the Dekker Web Solutions team.

While the initial reason for Faheem's hiring was for a one-time project, his technical expertise, management skills, communication abilities, and work ethic prompted my team to hire him in a full-time capacity.

Faheem is hard working, caring, trustworthy, ethical, and thorough. He consistently goes above and beyond the call of duty, and regularly provides insights and advice even in projects that do not lend him immediate financial return. He can be counted on to see even the most challenging projects through to the end, and serves my clients as if they were his friends or family.

"Faheem is easily the best website developer on Upwork. Faheem brought our desktop platform to life, and we asked him to help design our mobile layout. The layout is excellent - works well on multiple platforms. It suits our needs exactly! Faheem is fantastic at his job, but he's also just a good guy. Very funny, warm, and communicative. I would recommend him to anyone looking to have a responsive website built!"
